

Commercial Glass Dryer/Polisher

APPLICATION

Following washing, either by hand or in a commercial dishwasher, it is imperative to dry and polish the glasses to prevent water marks from drying on the glass.

The Bar Maid Dryer/Polisher blows warm air through spinning polishing heads which dries and polishes the glass inside and out.

PERFORMANCE

Air is heated with a 1350 watt heater and gently blown across the microfiber spinning polishing heads. One polishing head is in the middle which polishes the inside of the glass. Four outer microfiber polishing heads spin to dry and polish the outer surface of the glass. The stem and base on wineglasses can be quickly dried with the outer polishing heads.

FEATURES AND BENEFITS

- **Efficient** - Polishing heads simultaneously polish glassware inside and out and are dried by the warm air of the blower.
- **Gentle** - Soft microfiber twine minimizes stress on glassware, reducing potential for breakage.
- **Saves time and money** - Polishes up to 350 glasses per hour and minimizes costly glass breakage.
- **Sanitary** - Customers enjoy crystal clear glassware with minimal handling by facility personnel. Removable polishing heads can be washed and re-used. Replacement heads available.
- **Compact** - Small footprint, 11.5" w x 13" l x 20" h; ship weight 38 lbs.; 110v, 13 amps.
